Blueprint for a Safer Economy

Current tier assignments as of January 12, 2021

Tier assignments may occur any day of the week and may occur more than once a week. Select a county to see what region it's in.

COUNTY STATISTICS

County COVID-19 Statistics

San Mateo County COVID-19 Hospital Data

Data up to and including January 11, 2021

SAN MATEO
COUNTY HEALTH

These data are a snapshot of the capacity of hospitals reporting data to San Mateo County Health. It is not uncommon for these data to vary from day to day due to normal fluctuations in the number of patients cared for in the hospitals. If a hospital does not report a daily census, data from the previous day are used for the non-reporting hospital. Data reported may also include patients transferred from other locations and are referred to as out of County transfers. Out of County transfers may include both COVID-19 and non-COVID-19 cases. As of 12/27/2020, ventilators available and 'staffed and available' bed data source is HAvBED (Hospital Available Beds for Emergencies and Disasters) hospital poll via ReddiNet.

Currently Hospitalized
COVID-19 Patients

Deaths by Race/Ethnicity

Because of limited testing capacity, the number of cases detected through testing represents only a small portion of the total number of likely cases in the County. COVID-19 data are reported as timely, accurately, and completely as we have available. Data are updated as we receive information that is more complete and will change over time as we learn more. Cases are lab-confirmed COVID-19 cases reported to San Mateo County Public Health by providers, commercial laboratories, and academic laboratories, including reporting results through the California Reportable Disease Information Exchange. A lab-confirmed case is defined as detection of SARS-CoV-2 RNA in a clinical specimen using a molecular amplification detection test. Cases are counted by episode date; episode date is defined as the earliest of: case symptom onset date, sample collection date, date of laboratory result, or date of death. Deaths reported in this dashboard include only San Mateo County residents; death data last updated January 11, 2021.

DON'T LET YOUR GUARD DOWN – PREVENT
THE SPREAD OF COVID-19

Recommendations for Communities to Prevent COVID-19

A

Always mask in public, especially when talking

I

Insulate your household and any small, stable "Social Support Bubble" from the virus

M

Mask, isolate, self-quarantine, test IMMEDIATELY if concerned about symptoms or exposure

Local Testing

COVID-19 TESTING
